

## **Cyberpunk NPC - Persian Katra**

**Adept/Martial Artist/Cyberwhip Exponent**

**Subject:** Katra. Family name unknown.  
**Aka:** Kat, Kitty Kat, Persian Katra, Persian Kitty  
**Age:** 22  
**Origin:** Middle Eastern/East European Caucasian (Russian/Iranian)  
**Height:** 5' 53/4"  
**Weight:** 9st 3lb 51/2oz  
**Hair:** Blue/Black  
**Eyes:** Yellow. Cat cosmetic modification.

**Identifying Features:**-Modified, pronounced canines (cat); Subject is Mute - Possible Neurological/Psychological trauma induced.

**Cybernetic Implants:**-

**Eyes, Ears:** General modification and enhancement for covert surveillance operations.

**Current Occupation:**-

**Exotic Dancer/Personal Bodyguard.**

**Caution:**-

**Favoured weapon is the cyberwhip, used both to augment her natural gymnastic ability and employed with deadly force.**

Image is 'Eldora' by Brom, from the 'DarkEden' CCG.

Place of birth most probably a Russian border state, possibly Armenia. Probable Russian arcology assassin dance troupe training (Evidence: dance/combat style; use of the exotic cyber-whip; Russian, military grade, cyber-wear). Considering cyber-wear, most probably employed in an intelligence gathering, perhaps assassination, role. Induction into such troupes usually being from an early age, this may account for parental loss and the psychological pathology noted. The investment in hardware and training usually means defection from such troupes is virtually impossible.

### **Psychological Evaluation.**

Subject displays evidence of parental fixation - subject has indicated father died at an early age during one of the many border skirmishes, and mother disappeared after induction into the arcology. Development of apparent devotion/dependency surrogate relationships to compensate appear evident (See File: Ken "Pinky" Bruce). Subject may tend to lend more emotional weight to cursory or loose associations or relationships with others, such feelings remaining hidden or unexpressed due to the subjects emotionally defensive nature and current non-communicative state, (there is no evidence of any physiological trauma to account for the subject's current mute nature). Severe psychological trauma caused by forced implant of cybernetic devices is determined as most probable factor. Information on other related psychological trauma as yet undetermined but may account for the mild dependent/paranoid borderline personality disorder. Subject is likely to be cautious and secretive, rarely trusting, displaying possibly sadistic and vindictive hostile tendencies in seeking retribution if perceived to be betrayed, especially in an emotional capacity.
